CASHLESS CATERING

Dear Parent or Carer,

I am writing to inform you about our cashless catering system.

This system improves our ability to serve food quickly and efficiently, reduce the amount of cash circulating within the academy and make the process of getting a school lunch easier, it will also make it more convenient for you as lunches can be paid for in advance, online.

We have chosen the Live Register system, this uses the latest biometric technology to scan the student's finger; this generates a unique number used in the system to identify your child and allow them to spend money from their cashless account. The fingerprint image is not stored and cannot be used by any other system.

It's a very simple process...

Step 1

Registration into the Live Register system; the student's cashless account is set up and their finger scanned to associate the student with their account.

Step 2

Cash is loaded onto the student's account; by the parent opening up an online account (details will be sent out soon) and paying in by credit/debit card or by the student putting money into the cash loader in school.

Step 3

The student chooses their school lunch items and scans a finger at the till; this displays their name, photo and account balance to the till operator who then enters the cost of their food items, deducts the total from the account and the transaction is complete.

Registering students into the system will start before the end of term. **Please complete the form below and return it to the school at your meeting**, this will allow us to set up your son or daughter with a cashless account in the Live Register system

Yours sincerely,

Shane Ierston
